Bolt Series Quick Setup Guide

Mode A: Set up with Apple Home App

If you only want to control it through the Apple Home app, please follow the instructions below.

Install the Lock

Please make sure the lock is installed on the door and the battery is inserted before pairing with the app. If it is not installed yet, please read the Installation and User Guide to learn how to install the smart lock.

Open the Apple Home App

Press “+” and Add Accessory.

Scan the Label

Use Apple Home app to scan the HomeKit QR code label on the Battery Cover. Follow the directions on your phone.

Works with
Apple Home

Lock and Unlock

To lock your door

- Tap .
- Turn the thumbturn .
- Lock by Home app.

To unlock your door

- Enter the code and tap .
- Turn the thumbturn .
- Unlock by Home app.

These are the Codes

Why Keep Program Code Safe?

If you want to reset the lock to Factory Default Mode, you will need the Program Code (on the battery cover).

Note:

1. Please configure the Apple Home app within 10 minutes after installing the battery on the smart lock. If you miss it, reinstall the battery.
2. Before adding accessories, please turn on the Bluetooth of your phone.

Mode B: Set up with both U home and Apple Home App

U home and Apple Home app can control the Bolt Series simultaneously.

Keep your smartphone near the lock (within 10 feet) and search for the lock in the app.

Set It up with U home App

Please read the Installation and User Guide to learn how to set it up by U home app. If you have already set it up by U home app, please skip this step.

Once paired with U home, the Admin Code will be used of the Program Code to unlock the door.

Set It up with Apple Home App

- Press “+” and Add Accessory.
- Scan the HomeKit QR code label on the Battery Cover. Follow the directions on your phone.

Lock and Unlock

To lock your door

- Tap .
- Turn the thumbturn .
- By Home app or U home app.

To unlock your door

- Enter the code and tap .
- Turn the thumbturn .
- By Home app or U home app.

Apple HomeKit

Apple HomeKit technology provides an easy and secure way to control accessories that are compatible with Apple Home such as lights, doors, thermostats, and more with the Home app and Siri on your iPhone, iPad, Apple Watch, HomePod, HomePod mini, or Mac. To control this HomeKit-enabled accessory, the latest version of iOS or iPadOS is recommended.

A customer who owns an Apple TV (4th generation or later) or a HomePod/HomePod mini can control HomeKit-enabled accessories away from home and automatically. Create scenes that allow you to control multiple accessories at once. Controlling this HomeKit-enabled accessory automatically and away from home requires a HomePod, HomePod mini, or Apple TV set up as a home hub. It is recommended that you update to the latest software and operating system.
